

Annex 7 – TWT quick Users' Guidelines

Tiger Worm Toilets Quick Users' Guidelines Koinadugu District, Sierra Leone		 OXFAM
		
<p>Only use fresh water when flushing the toilet bowl. Detergents, soap and salty water are harmful to the worms.</p>	<p>When cleaning the bowl, use only fresh water & soft brush. Never use soap, detergent or any cleansing agents as these will harm the worms.</p>	
		
<p>Never throw any objects into the bowl. Used menstrual items should be disposed of separately. Any object aside from the human waste and water will affect the performance of the toilet.</p>	<p>If there are issues with your latrine that you cannot fix alone (smell, flies, toilet not flushing, etc.), contact the nearest TWT Technician in your area for support.</p>	
		
<p>Maintain the cleanliness in and around your toilet. Comply with the required number of users to ensure that your toilet works properly.</p>	<p>Wash hands with soap & clean water after latrine use. Always provide clean water and soap near latrine for washing hands.</p>
